## ALFASILVER SPRAY TREATS MINOR INJURIES ON THE GO

---

Cuts, grazes, minor burns and blisters happen all the time. With AlfaSilver Spray, you can quickly treat the injury, even when it's in a difficult to reach place or it's quite large. Which means you can get back to what you were doing.

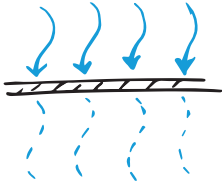

---

AlfaSilver Spray is a new wound treatment with antibacterial silver ions that speeds healing of cuts, grazes, minor burns and blisters.<sup>1</sup>

---

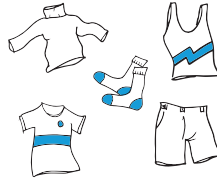

## AlfaSilver Spray is a simple first aid solution

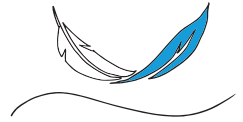

*Breathable barrier that speeds the healing process<sup>1</sup>*

*Silver ions provide antibacterial protection<sup>1</sup>*

*No risk of rubbing off on clothes<sup>1</sup>*

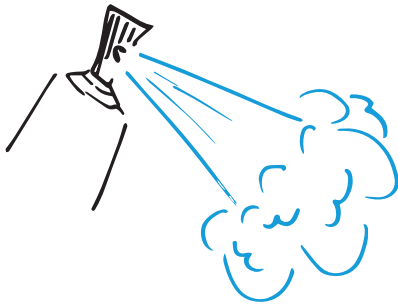

*Suitable for sensitive skin<sup>1</sup>*

---

## Simple and soothing application<sup>2</sup>

- Clean the injury as best you can
- Shake the can and spray on the injury in short intervals
- The spray shows as a white coating so you can see when the injury is covered
- Wipe excess off healthy skin and on you go!\*

\*Excess powder is entirely normal and is due to each wound being different (e.g. how much it oozes) and the mineral coating required to fully cover it.

Ask your pharmacist for AlfaSilver Spray or visit our website for more information: [www.alfasilver.co.uk](http://www.alfasilver.co.uk)
